

SVG

Drawing a Circle

To draw shapes with SVG, you first need to create an **SVG** element tag with two attributes: width and height.

```
svg width="1000" height="1000"></svg>
```

HTML

To create a circle, add a **<circle>** tag:

```
<svg width="2000" height="2000">  
  <circle cx="80" cy="80" r="50" fill="green" />  
</svg>
```

HTML

Try it Yourself

- **cx** pushes the center of the circle further to the right of the screen
- **cy** pushes the center of the circle further down from the top of the screen
- **r** defines the radius
- **fill** determines the color of our circle
- **stroke** adds an outline to the circle
