

Attributes

Attribute Measurements

As an example, we can modify the horizontal line so it has a width of 50 pixels.

This can be done by using the width attribute:

```
<hr width="50px" />
```

HTML

Try it Yourself

An element's width can also be defined using percentages:

```
<hr width="50%" />
```

HTML

Try it Yourself

An element's width can be defined using pixels or percentages.
