

## Drag&Drop API

### Making Elements Draggable

The drag and drop feature lets you "grab" an object and drag it to a different location.

To make an element draggable, just set the **draggable** attribute to true:

```
<img draggable="true" />
```

HTML

Any HTML element can be draggable.

The API for HTML5 drag and drop is event-based.

#### Example:

```
<!DOCTYPE HTML>
<html>
  <head>
    <script>
function allowDrop(ev) {
    ev.preventDefault();
}

function drag(ev) {
    ev.dataTransfer.setData("text", ev.target.id);
}

function drop(ev) {
    ev.preventDefault();
    var data = ev.dataTransfer.getData("text");
```

HTML
