

The audio Element

Attributes of <audio>

controls

Specifies that audio controls should be displayed (such as a play/pause button, etc.)

autoplay

When this attribute is defined, audio starts playing as soon as it is ready, without asking for the visitor's permission.

```
<audio controls autoplay>
```

HTML

Try it Yourself

loop

This attribute is used to have the audio replay every time it is finished.

```
<audio controls autoplay loop>
```

HTML

Try it Yourself

Currently, there are three supported file formats for the <audio> element: MP3, WAV, and OGG.
